mega.co.nz/ April 29, 2020, depending on the type of problems that an aquaponic farmer may encounter, there are certainly different solutions. Some problems can be fairly simple to solve, while some can be more complex. Come on... Here we have provided you with various sources of information so that you can go and search for more information yourself. Please keep in mind that aquaponics is growing very fast all over the world, because of this rapid growth it is very difficult to keep this list updated with the latest information, however we will try to keep things as updated as possible. First, you'll find links to free information, it's either PDF or Microsoft Word Document files that you can download, as well as large repositories of good information. IBC Aquaponics is the first edition of the guide designed to educate beginners in Aquaponics, as well as inform and inspire experienced Aquaponics enthusiasts. The IBC aquaponics guide is an interactive PDF, with links to Youtube and Google Sketchups up to 20 systems and an interactive menu. All systems have been developed and created by Backyard Aquaponics forum participants around the world, from the US to Hungary and Australia. It provides a comprehensive photo library of systems and information about the process of their creation. Backyard Aquaponics Magazine The first edition of Backyard Aquaponics is available as a free download. This question has been put together by administrators and moderators of the Backyard Aquaponics Forum, as an information source to explain the basics of aquaponics, and how aquaponics works. It was also a precursor to the ongoing editions of BYAP magazine, which can be bought through a subscription, both electronically and in a print glossy magazine that we have just begun to publish. The first edition of the magazine is free, and available for download by clicking on any of the sample pages above. Is a 5MB PDF file with 36 pages. Additional information about BYAP and subsequent editions is available on the BYAP website. Travis Huey's Travis Huey Barrel-Ponics guide has been a huge help to people all over the world. Travis wrote a guide about aquaponic systems that he developed using barrels/drums, he then released it to everyone, for free, so that they could build their own aquaponics systems from cheap recycled materials. Its 101 page guide comes in the form of a 3MB PDF file that can be downloaded this link. Travis also has a website that updated with a lot of information and he writes frequent articles for Backyard Aquaponics Magazine. You can visit his website here ATTRA Aquaponics - Integrating Hydroponics with Aquaculture This white paper has been put together by Steve Diver of NCAT, the National Center for Relevant Technology, which is funded by the United States Department of Agriculture. Steve wrote an article about aquaponics in the 1990s, but with the increasing popularity of aquaponics over the past decade, he felt that the document had to be rewritten to include the latest information and references. This is an extensive reference document, given that it is only 28 pages long. Filled with links and information, it's well worth downloading and reading. You can watch it online through attra's website here. Or it can be downloaded as a 1.2MB PDF through your website or by clicking on the sample pages above. ATTRA Aquaponics - The original This white paper was put together by Steve Diver, NCAT agricultural specialist in February 2000. This is Steve's original article on aquaponics, and contains a variety of information, it is very different from his aforementioned paper. This article can be downloaded as a 0.4MB PDF through our website or by clicking on the sample pages above. You can watch it online through attra's website here. Integrated agri-aquaculture systems Very interesting and substantial paper produced in Australia, by the Rural Industry research and development corporation in 1993, this document was presented as a report of different methods practiced by some farmers, in combining agriculture and aquaculture. Various examples of working integrated systems are used in great detail. This extensive paper is worth reading, especially if you are interested in the commercial side of aquaponics, and the various methods of integrating aquaculture and agriculture. RIRDC are an Australian government organization that helps explore and create new technologies in the rural sector, there is a lot of interesting information on their website here. The integrated document of the Agri-Aquaculture system is 189 pages long, downloading 1.2MB PDF is available directly from their website on this link or by clicking on the sample of pages above. Aquaponics - Common Sense Guide This paper is a summary of months of research and experiments with aquaponics. Author Michael Tesel, who is based in San Antonio, Texas, USA, is a member of the BYAP forum and shares his understanding with readers. This PDF is a great tool for beginners and experienced people, as it provides information from a wide variety of sources. The author provides detailed information on various methods of draining and pumping water from the growl. Michael also provides readers with a very detailed troubleshooting page that can be used as a quick link if you encounter any problems with your system. Common Sense Guide to Aquaponics, 28 pages, 0.5 MB MB Download is available directly from our site on this link or by clicking on the example pages above. Aquaponics - Integration of Fish and Plant Culture is a 16-page paper on the University of the Virgin Islands Aquaponic Systems and Research. This article was written primarily by Dr. James Rakoczy, who is widely known as one of the leading experts in aquaponics, in the modern world. This is an important reading for those interested in the commercial side of aquaponics. The PDF is a 300KB download that can be downloaded by clicking on the sample pages above. Also, you can visit their website here Small Block Aquaponics It's a 15 page guide, it's fun to read for those who want to build their own system from recycled materials like 200L blue barrels. Written by Dr. Paul and Bonnie Range, from oneseeding.com. Paul and Bonnie have been involved in aquaponics for years. They have also been involved in many other areas of inter-regional and alternative agriculture, as well as alternative energy production. This is a must-read for DIY aquaponics enthusiasts. This PDF is only 1.7MB downloaded and can be downloaded by clicking on this link or by clicking on the sample pages above. On-Farm Food Safety - Aquaponics This eight-page guide demonstrates how all commercial aquaponics businesses must process products to maximize the health and safety of the consumer and employee. The document was created by the College of Tropical Agriculture and Human Resources, which is based in Hawaii. This is a very useful and informative document for those who think about the work of Aquaponics Business. This PDF is only a 0.6MB download and can be downloaded by clicking on this link or by clicking on the sample pages above. Alternatively you can visit their website here update on Tilapia and vegetable growing in the UVI Aquaponic System This is a PDF version of powerpoint presentation, about UVI aquaponic systems. The 49 page PDF has some fantastic pictures of their aquaponic system, along with detailed production figures. This is an important reading for those who study the commercial aspect of aquaponics. This PDF is only 1.5MB downloaded and can be downloaded by clicking on this link or by clicking on the sample pages above. Alternatively, you can visit their website here at Cabbage Hill Farm - Aquaponics This is a PDF version of the PowerPoint presentation, about Cabbage Hill Farm and their aquaponics system. They are an organization that is dedicated to the practice of sustainable agriculture, particularly focused on aquaponics. This PDF gives a complete picture of their system, and is a vital tool for any commercial manufacturer. This PDF is only a 7.8MB download and can be downloaded by clicking on this link or by clicking on the sample pages above. In addition, you can visit their website here To score and develop Aquaponics and the potential of the product market in Alberta this is an extremely indepth document. 190-page report on commercial Canada, an extensive study by Dr. Nick Savidov, Center for Crop Diversification. Dr. Savidov has been active in aquaponics for many years, and this article is a testament to his work. This report includes many tables and graphs detailing the production levels achieved with their aquaponics systems. Substantial reading for those who are looking at the commercial possibilities of aquaponics. This PDF is only a 3.4MB download and can be downloaded by clicking on this link or by clicking on the sample pages above. Alternatively, you can visit their website here for the Simplified Aquaponics Guide to Dr. Paul's Other Aquaponics Guide and Bonnie Range. This is another important read for DIY enthusiasts. 16 pages with lots of images and diagrams, as well as instructions on how to create, initiate and operate an aquaponic system made from mostly recycled materials. This PDF is only 1.5MB downloaded and can be downloaded by clicking on this link or by clicking on the sample pages above. Also, you can visit their website here Aquaponics and Food Safety It's very interesting to read from Gordon Chalmers, about aquaponics, and how it can help solve many of the food production issues we currently face. If you after colorful photos it probably won't be for you, however, if you like a lot of information then this 114 page document is definitely worth downloading. This PDF is only a 0.5MB download and can be downloaded by clicking on this link or by clicking on the sample pages above. Primeron Solar Aquaculture - Aquaponics In-depth article on the emergence of alternative aquaculture practices that lead the way to more advanced fish production. The study suggests that certain chemistry in the water directly affects the growth and health of fish. This paper outlines the main findings and theories, and discusses the tsewig pond - which uses plants to filter aquaculture water. This PDF is only a 4.5MB download and can be downloaded by clicking on this link or by clicking on the sample pages above. This long-lasting PDF focuses on Aquaponics in Barbados. The document sets out the relevant fish species, plant crops and information on commercial production. It also outlines alternative ways of practicing aquaponics, such as the use of coconut husks as an environment. There is also some detail about specific plant nutrients and requirements for commercial crops. This PDF is only 3MB downloaded and can be downloaded by clicking on this link or by clicking on the sample pages above. Courtesy of Damien Hinkson and McGill University students. International Institute of Specialized Skills - Aquaponics A very detailed document outlining various developments in aquaculture and hydroponics; some of which can be used in aquaponics systems. Andrew S. de Deseni was sponsored Australia in order to compile this report, and these are his conclusions. This PDF is only a 1.7MB download and can be downloaded by clicking on this link or clicking on the sample sample Above. Aquaponics Design Indepth take a look at various aspects of the aquaponics system. This document follows from the Master Aquaponics report. A fair amount of detail and some great diagrams and photos make this document a good read. This PDF is only a 2.8MB download and can be downloaded by clicking on this link or by clicking on the sample pages above. Bill Mollison Permaculture Bill Mollison is the founder of Permaculture, and has released hundreds of articles, books, DVDs, CDs and information packages to help promote more sustainable practices. Bill is a fantastic presenter and speaks with such passion and enthusiasm. We were able to get a high-quality recording of one of Bill Mollison's presentations for download. It was a seminar he held in Nunup, Western Australia. Note: these recordings have been compressed for easy downloads, to the detriment of sound quality. Nannup Workshop Part 1 (3.8Mb) Nannup Workshop Part 2 (5Mb) Thank you so much to Jeff Nugent and Bill Mollison for making the above two downloads available. Small articles and information Two pages of a document describing alternative farming methods. An article about the use of an existing fish pond for growing vegetables - two pages. A small article about the commercial aquaponics system Morning Stars. Could aquaponics be the answer to Australia's salinity problem? A brief reading about the alternative commercial aquaponics system. Is aquaponics the answer to life in the city centre? Interesting to read. A short article about the appearance of backyard aquaculture / aquaponics. The article focuses on backyard aquaponics and benefits for families. A comprehensive article on the waterponic system at the University of the Virgin Islands. A short article on the university of Arizona's aquaponics system. Links to websites websites come and websites go, it seems that aquaponics sites are springing up all over the place. Therefore, this is by no means a complete list of aquaponic related websites, however, a list of sites that have usually been created for a while and there is interesting information. www.townsr.com/snsaqua Place to begin with, the original pioneers of media based on aquaponic systems, bringing aquaponics to the masses. You should definitely visit Paulias' website and join her aquaponics list where you can talk to people from all over the world who are interested in aquaponics. www.aquaponics.com one of the best websites for information about aquaponics. Based in the United States with an array of available information, including the only publication specifically devoted to aquaponics, available in both print and electronic PDF format every two months. aquaponicsgardening.wordpress.com/ a blog site with a lot of information about what is happening in the aquaponics industry in the US. That's great information. www.aquaponics.com.au Aquaponics is a unique new company in Western Australia, aimed at helping people their own aquaponic system installed in their home. attra.ncat.org/attra-pub/s/aquaponic transfer technology to rural areas is a fantastic site for getting information about aquaponics, and more. The site also contains information and links to many other sites and sources. www.cabbagehillfarm.org the production of ethical food, including a reasonable-sized aquaponic system, as well as many other agricultural production systems as well as the heritage of plants and animals. aquaponics.20megsfree.com site put together by Mike, a longtime member of the Paulas Aquaponics list. If you go to the T-shirt links page, it has organized an incredible number of links sorted by subject that are well worth a look. Aquaponics, based in Victoria. Victoria.
